Meter Reading Information

- Weather permitting, all meters are read monthly. On occasion winter weather will limit access to meters at which time usage is estimated based on the same time frame from the prior year. New customers receive a minimum bill.
- The City has a combination of manual read meters and radio read meters. Manual meters are read by the operator actually opening the meter pit and viewing the register. Radio meters are read thru electronic means and the reading is transmitted to a unit held in the vehicle as it gradually moves thru the neighborhood. These readings are then used to calculate monthly water bills.
- For meter reading and maintenance purposes, customers are asked to maintain a three-foot perimeter around the meter pits. Landscaping and other items encroaching within that perimeter will be removed.
