Meter Reading Information

- ✚ Weather permitting, all meters are read monthly. Occasionally winter weather will limit access to meters at which time usage is estimated based on the same time frame from the prior year. New customers with no billing history receive a minimum bill.
- ✚ City of Eagle residential customers have radio read meters; commercial customers have manual read meters. Manual meters are read by the operator actually opening the meter pit and viewing the register. Radio meters are read thru electronic means and the reading is transmitted to a unit held in the vehicle as it gradually moves thru the neighborhood. These readings are then used to calculate monthly water bills.
- ✚ For meter reading and maintenance purposes, customers are asked to maintain a three-foot perimeter around the meter pits at all time, every season of the year. Landscaping and other items encroaching within that perimeter will be removed.

*Thank you,
City of Eagle Water Department
